Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-15, when R5-R8 together form non heterocyclic ring and R1 is non heterocyclic, drawn to compounds, composition and method of use.

Group II, claim(s) 1-15, when R5-R8 together form bicyclic heterocyclic ring containing and R1 is non heterocyclic, drawn to compounds, composition and method of use.

Group III, claim(s) 1-15, when R5-R8 together form non heterocyclic ring containing and R1 is heterocyclic, drawn to compounds, composition and method of use.

Group IV claim(s) 1-15, 1-15, when R5-R8 together form heterocyclic ring and R1 is heterocyclic, drawn to drawn to compounds, composition and method of use.

Group V, claim(s) 16, drawn to plant propagation material.

Group VI, claim(s) 17, drawn to compound of formula (B).

Group VII, claim(s) 18, drawn to compound of formula (D).

Group VIII, claim(s) 19, drawn to compound of formula (AA).

Group IX, claim(s) 20, drawn to compound of formula (VIIa) or (VIIb).

The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Compounds of various Groups are structurally divergent and are chemical disparate. A reference anticipating one of the above group, may not render the others obvious. Additionally, compounds of Group I-V and Group VIII are either anticipated or render obvious over various references cited in P.210.N report.

**Additionally, applicants should elect a single disclosed species for the examination purposes for the either of the Group elected, and point out to the claims that reads on the elected species. Claims will**

**be examined to the extent they read on the elected species and closely related compounds.**

In view of the complex nature of the restriction requirement, a written restriction requirement has been made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention or species.

Should applicant traverse on the ground that the inventions have unity of invention (37 CFR 1.475(a)), applicant must provide reasons in support thereof. Applicant may submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. Where such evidence or admission is provided by applicant, if the examiner finds one of

the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SHAILENDRA KUMAR whose telephone number is (571)272-0640. The examiner can normally be reached on M-F, 7:30AM-5:00PM, alternate Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel Sullivan can be reached on 571-272-0779. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
